

CLEAN MOTION

Launch 2026

CLEAN MOTION

Clean Motion is a Swedish company focusing on providing vehicles for sustainable urban mobility.

Since the start of the company some 14 years ago, smart, fun to drive and sustainable vehicles have been the focus.

Our latest Vehicle EVIG comes in four models

- EVIG Delivery
- EVIG Utility
- EVIG Event
- EVIG Memorial

The base vehicle has a light weight and flexible design and can easily be customized to various user needs.

During 2026 EVIG will be launched in in Europe

» Designed to be Energy-efficient

- Integrated solar panels extend the range, reducing reliance on charging stations
- Lightweight Design requires less energy to move, making it drastically more efficient.
- Low Total Cost of Ownership – Less energy, less maintenance, and more uptime for businesses.
- A Climate-Positive Vision – zero emissions and truly sustainable product helps businesses meet sustainability targets.

Model: EVIG

Type: Three wheeled motorcycle

Vehicle class: L5e-B

Cockpit: 1 driver seat with 3-point safety belt

Reverse gear: Yes

Brake system: Combined brake system (CBS)

Regenerative breaking

Connectivity: Yes

Fleet management: Yes

PERFORMANCE

Max speed: 60 km/h

Range: 100 km

Power motor: 9,7 kW

Power solar panel: Approx. 500 W

Battery: 10 kWh

Charging time: 8 h

Connection: Type-2

BODY

Versions: EVIG

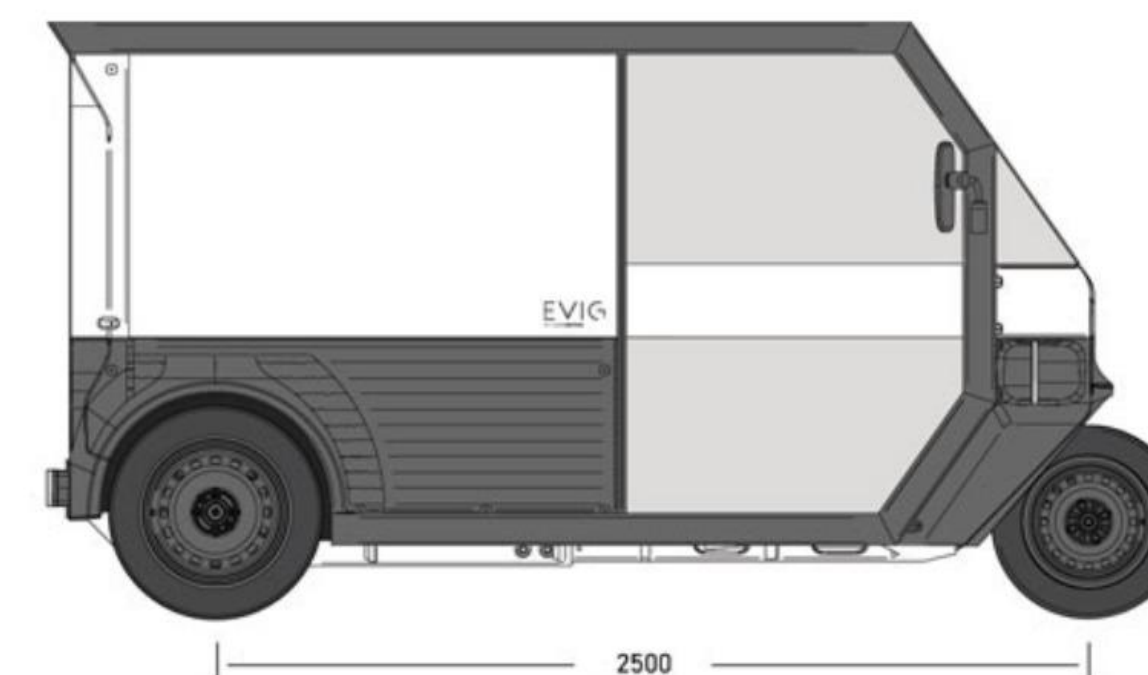

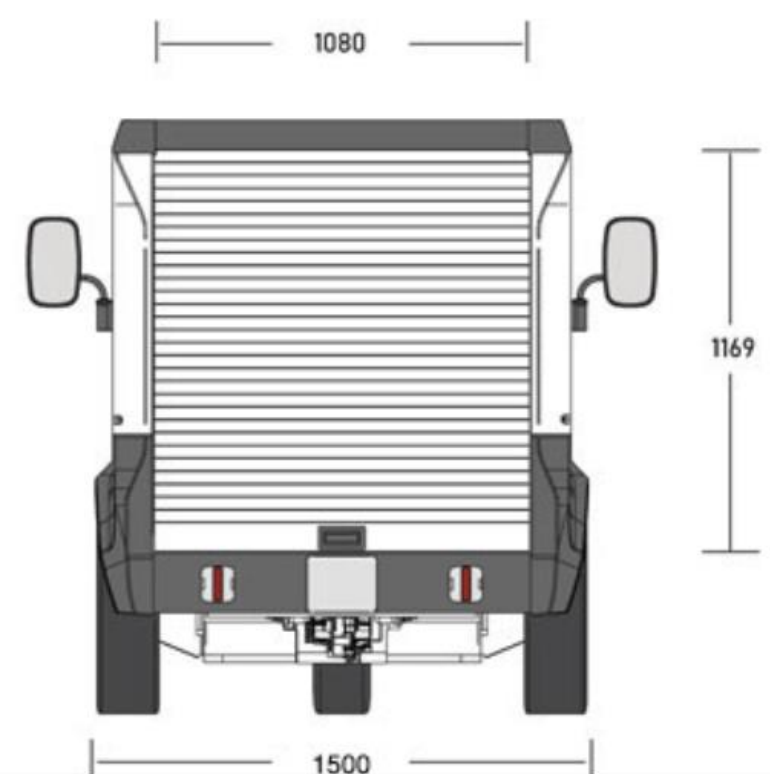

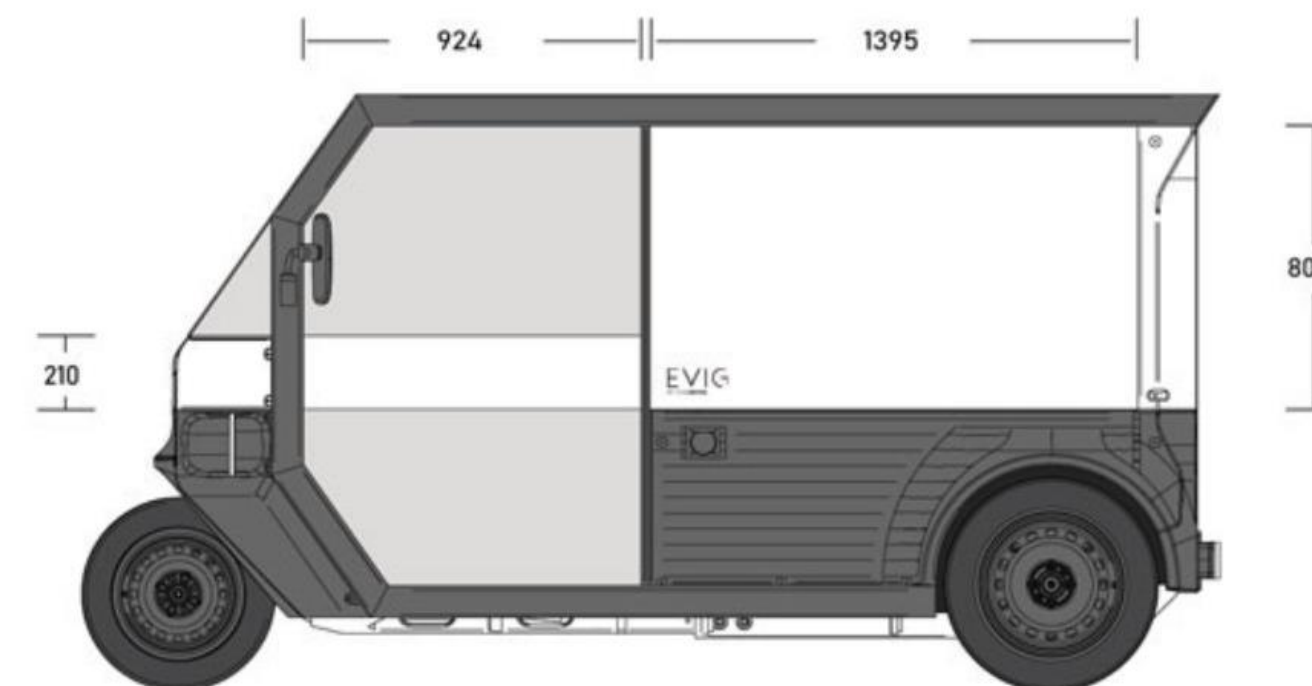

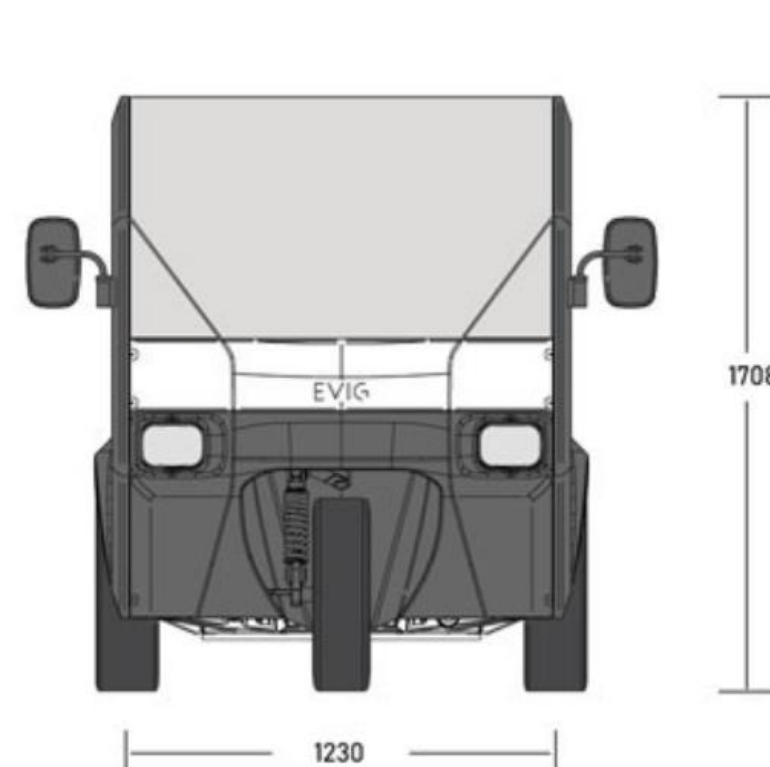

Length: 3,250 mm

Width: 1,500 mm

Height: 1,750 mm

Cargo weight: 300 kg

Cargo volume: 2,3 m³

L EVIG Delivery

Built for efficient last mile delivery. EVIG Delivery has a delivery focused dashboard, side doors and a modular shelving system in the cargo area. This gives quick access to parcels and helps keep everything organised on route.

EVIG Delivery is easy to manoeuvre, have a generous driver compartment thus helping the driver to stay focused throughout the day. Designed specifically for urban logistics with a compact yet flexible cargo area, it brings a new level of efficiency to the last mile. The side of the vehicle is perfect for branding your business and show your sustainable way of working.

- Side doors for easy cargo access
- Modular shelving options to adapt to your needs
- Delivery Dashboard

CLEAN MOTION

EVIG Utility

EVIG Utility is designed specifically for service-oriented operations. Its lightweight, energy-efficient architecture and solar-assisted power system support long operating hours with minimal energy consumption. With quiet operation, frequent stop capability, and low maintenance requirements, EVIG fits seamlessly into environments where traditional utility vehicles struggle—helping teams work efficiently while meeting sustainability goals.

Equip your EVIG Utility to your needs and you get a high performing, flexible and practical vehicle to your operations. Charge your tools on the go or while parked with solar energy.

The trademark of the EVIG Utility is the practical set up for the professional gardener or technician servicing your facilities. Side cargo doors, external tool racks, 230 outlet in the cargo area and a tow hook. Modular shelving options adaptable to your needs

- External tool racks
- 230 outlet in the cargo area
- Tow hook – handle light towing tasks with ease
